

Vertex Roofing is Arizona's Premier Contractor for Lifetime Metal Roofing

The Vertex team brings you decades of experience with metal roofing. We are factory trained and certified professionals, specializing in Lifetime Metal Roofing.

From manufacturing and fabrication to supply and installation every step of your project is handled in house by the Vertex Team of qualified professionals to ensure you get the job done right the first time.

 GreenSky® ZERO INTEREST FINANCING AVAILABLE

Stone Coated Steel

Whatever the style, color or finish of your current roof, there is most likely a Stone Coated Steel Roof that will match the appearance of your home. Whether you want the look of an asphalt shingle, clay tile, or a cedar shake, you can select a Stone Coated Steel Roof that will enhance the beauty of your home. Many colors to choose from!

Metal Shake and Slate

Our Metal Shake and Slate products have a unique 4 way interlocking system that locks out the harshest of weather conditions. This steel product has Kynar 500®, the industry's premium finish, which is corrosion-resistant, virtually maintenance free, and has superior color retention. Over 20 color options to choose from!

Custom Roll-Formed Standing Seam

Our Standing Seam product is custom fabricated and mechanically seamed. This is done on-site by our trained technicians on our roll forming machine. We will come out to your home and you can watch as our technicians make the custom panels for your roof. Our standing seam product has the Kynar 500 finish as well, giving the security that it will last a lifetime! 30+ colors to choose from!

Other styles available along with Wall Panels, Soffit & Fascia

FREQUENTLY ASKED QUESTIONS

Q: Won't a metal roof make my house hotter than it is now?

A: No! In fact, having a steel roof system from Vertex is one of the most energy efficient choices you can make for your home resulting in up to 40% savings on your home cooling costs!

Q: Will a metal roof be noisy when it rains?

A: What you would experience with a metal roof would be virtually the same as what you'd hear on any conventional asphalt roof.

Q: How will metal hold up to hail?

A: Metal holds up better than any other type of roofing material! It won't crack, break or shatter and you will even be able to have a warranty that covers it against hail damage!

Q: How heavy is a metal roof?

A: What surprises most people is that at 1-1.5 pounds per square foot metal is one of the lightest choices for your roof...nearly half the weight of asphalt shingles!
